WALK AROUND

Recessed light tower mounting

Wheel well compartment, pvc toolboxes, and bottle storage

Ladders and pikepole storage

Trays and shelving with mission specific layouts

Hydraulic generator

Breathing air fill station and storage

These are the typical specifications for the Walk Around Rescue:

PRODUCT CAPABILITIES: Full-use Rescues, Extrication, Air/Light, Trench Rescue, Hazardous Materials; each body is capable of exceeding the requirements of the application. Designed to adapt as the vehicle mission expands, user can reconfigure compartmentation accessories with common hand tools.

Extensive engineering reviews to include weight distribution, center of gravity, and electrical load analysis insure technical compliance. A real world approach to equipment placement further insures access to equipment with minimal risk to crew.

CHASSIS: American LaFrance Eagle®, Metropolitan and Freightliner M2.

BODY CONSTRUCTION:

Formed stainless steel or aluminum fully welded construction available in Medium/Heavy-Duty.

BODY SUB-FRAME: Structural stainless steel or aluminum frame welded integral to body creating a unitized compartment system. Rubber isolated frame mounting.

COMPARTMENT ACCESSORIES: All trays, shelves, toolboards, and slide out drawers have been certified at their particular rating to insure proper application in service. Roll-up doors with the option of hinged doors further permit custom tailoring of compartment access.
